Gentlemen:

**Sub: Installation of Kitec Pipes and fittings**

We have used Kitec Pipes and Kitec PVC fittings supplied by you to connect chilled water riser pipes to FCU's installed in rooms. This installation is carried out in Hotel Le Royal Meridian at Sahar, we have used Kitec pipes of size 25x32 & 20x25.

We hereby certify that we found installation much easier and faster due to flexibility of pipes, also the pipes with fittings were tested successfully at 7 kg/sq.cm. hydraulic pressure. The pipes are easy to insulate with tubular nitrile rubber insulation. As the pipes are supplied in a bundle of 100 feet length it can be installed without a joint. It is ideal for hotel installations.

Thanking you. we remain,

Very truly yours
