TO WHOMSOEVER IT MAY CONCERN

This is to certify that we have installed kitec pipes & fittings supplied by M/S Ecoplas Marketing, Nasik. Kitec pipes of 1216 & 1620 diameter with brass fittings were used for supplying LPG to gas brooders under regulated pressure from a central pressure tank.

Installation & testing was done for 3 sheds in July 99 are successfully operating till date. We have found kitec pipes to be ideally suited for this application due to its non-corrosive property, adequate pressure ratings, less joints & ease of installation. Kitec pipes completely eliminate the rusting problem occurring in conventional piping due to liquefaction of LPG in the supply lines, which choke up the brooders.

Presently we are installing of around 700 mtr. length of kitec pipes for our new poultry project.

For C & M Poultry Services,
