We, at Dynamic Kitchens, are dealing in marketing & installation of Modular Kitchens. . We have been using Kitec Composite Pipes for connecting gas cylinder to the hot plates for over 7 years now. We find Kitec Pipes very convenient as compared to G.I. Pipes as they offer us flexibility to do the installation in the limited space that is available. Also the long term benefits that go with Kitec Pipes enables us to convince our clients. Besides individual residences, we have also installed Kitec Pipes for Indian Airforce at Sambra Airforce Station, Belgaum, for LPG in their canteen kitchens about 1 year ago and so for the system is functioning very well.

We highly recommend the use of Kitec Composite Pipes.
