To,

Whomsoever it may concern,

This is to be certifying that we have installed **Kitec pipe** purchased from M/s Bhagyalaxmi Sales Corporation, Apana Bazar, Jalana Road, Aurangabad for following industrial Applications:

- 1) For LPG pipe line having line pressure 5-6 Kg/cm²
- 2) Hot water and Hot Oil Line having temperature 70-80 degree Centigrade

The pipe installed around two years back and we are extremely happy and satisfied with the performance.

Before using Kitec pipe we were using higher quality MS and GI Pipe in which we were facing problem like pipe is getting rusted and leakages from joint and regular maintenance cost.

Now after installation of Kitec pipe; there is no leakages and no maintenance and it's fitment is user's friendly as it can be twisted as per our wish and numbers of joints are very less.

We are extremely thankful to Kitec peopeles for providing such a wonderful solution for pipeline in industrial and domestic applications.

Thanking you.

Yours Truly,

Shyam N Choudhari
