

# AURANGABAD GYMKHANA

Date: 18-7-14

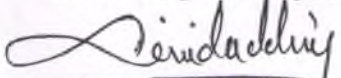

## To Whom It May Concern:

This is to certify that we have been using KiTEC PE-AL-PE Composite Pipes for various applications such as hot & cold water. The pipe have been found technically far superior and we have also replaced corroded GI "C" Class Pipe in our Building.

The product has been found technically superior as it offers all the advantages associated with metal and plastic pipe while eliminating the weak points of the respective materials. Besides, the installation of the pipe is simpler and without the aid of any external material. Technically sound, reduced number of fittings and easy jointing systems is what impressed us on the system.

We have been using the system for the past Four years and we have no complaint.
