Building Repairs & Re-development Consultants

Licensed Structural Engineers

DATE: 08 - 07 - 2010

TO WHOM SO EVER IT MAY CONCERN

This to certify that we have used kitec pipes & fittings in our repair projects for various societies for down take & loop water supply lines. We found lots of advantage as compared to G.I pipes such as no wastage, easy to bend, less fitting, corrosion free & cost effective.

We found lot of technical support from the kitec team. We wish then bright future.

This information is as per the request only.
