CERTIFICATE

TO WHOM SO EVER IT MAY CONCERN

1. The existing GI Pipe line in my residential flat has been replaced with KiTEC composite Pipe. This system has been commissioned successfully after hydraulic pressure testing.
2. I am extremely satisfied with the concept and quality of KiTEC piping system because it requires minimum fittings and all the elbows at corners are eliminated, as the pipes can be hand bent. The system is simple and leak proof. Since the KiTEC Pipes are chemically inert and the fittings have brass inserts, there are no chances of "Corrosion" in the pipeline.
3. I strongly recommend the use of KiTEC Piping system for internal & external plumbing line to those who are looking for better technology in a piping system without any worry on its maintenance. The service provided by the Company's marketing associates, M/s Unique Pipetech is also to my full satisfaction.
