CERTIFICATE

TO WHOM SO EVER IT MAY CONCERN

This is to certify that we have examined thoroughly and finally used KiTEC Composite Pipes and fittings for internal plumbing line of Hot & Cold water line of about 20 toilet blocks and 10 kitchens at our project “Neelkanth Apartment” located at Kanke road, Ranchi.

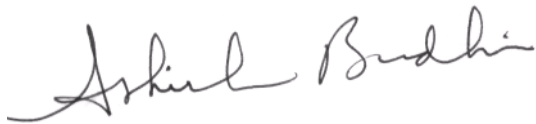

Later, we have used KiTEC pipes and it's fittings for 15 toilet block and 6 kitchens for Hot and cold water plumbing lines in “Churu Apartment”, our next project at Morabadi, Ranchi.

We would like to confirm that we have found KiTEC Pipes and its fittings most suitable for internal plumbing line of Hot & cold water particularly at projects where iron contents in water is high. Since these pipes are chemically inert, corrosion will not take place like in GI pipes. Due to its compression type fittings and availability of pipes in coils and because of it's malleable nature, installation is observed to be very convenient, fool proof and fast.

The technical superiority of KiTEC pipes over conventional pipes will have weight-age in our decision to use these pipes in our all-future projects. We also recommend KiTEC pipes to all promoters who are looking for maintenance free and cost effective piping system.

Thanking you
