TO WHOMSOEVER IT MAY CONCERN

In 2000, we have done the renovation of our entire hotel wherein we have used Kitec Composite Pipes for total plumbing i.e. hot, cold and chilled pipe lines for FCU. It is almost 4 years now since the pipes have been in use and we are happy to state that we have had no problems with the functioning of these pipes. Also the water flow is as good as it was in the initial stages.
