**TO WHOMSOEVER IT MAY CONCERN**

This is to certify that we have been using PE-AL-PE Composite pipes for various applications. We have used PE-AL-PE pipes in more than 600 houses for hot and cold water lines. The pipes have been found technically far superior and we have also replaced corroded conventional pipes in more than 100 houses with PE-AL-PE pipes due to the better performance.

The product has been found technically superior as it offers all the advantages associated with metal and plastics while eliminating the weak points of the respective materials. Besides, the installation of the pipes is simpler and without the aid of any external materials. Technically sound, reduced number of fittings and easy jointing system is what impressed us on the system.

We have been using the system for the past three years and we have no complaint.
