

Sanitary Engineers & Licensed Plumbers

Ref No.

Date: April 30, 2004

TO WHOM SO EVER IT MAY CONCERN

This is to certify that we have used Kitec pipes and fittings for internal concealed hot and cold fittings in bath rooms in entire buildings. Also we have used these pipes and fittings exposed in the ducts. We are 100% satisfied with the material, its durability, resistance to heat lost and non corrosiveness. All the joints are openable and any fitting can be replaced for any alteration purpose without cutting the line and can be reconnected at same place. Damages to the pipe in negligence and drilling in the wall can be attended to at the same spot

There is considerable saving in labour handling and transportation
